COMMUNITY RELATIONS PLAN

PLUM BROOK ORDNANCE WORKS

SANDUSKY, OHIO

1.0 OVERVIEW OF THE COMMUNITY RELATIONS PLAN

The Community Relations Plan (CRP) outlines procedures to involve the community with the site restoration process at Plum Brook Ordnance Works (PBOW) located in Sandusky, Ohio. Effective communication and information exchange between members of the community, regulatory agencies, Restoration Advisory Board (RAB) representatives, and the US Army Corps of Engineers (USACE) is essential in maintaining the support of the site restoration activities. The CRP requires the involvement of citizens from the communities and representatives from federal, state, and local agencies that are active in policy and decision-making processes. The USACE is the lead agency for the environmental restoration at the PBOW site. The Ohio Environmental Protection Agency (OEPA) is responsible for overseeing the PBOW remedial activities and to monitor compliance with all applicable federal and state regulations.

2.0 SITE DESCRIPTION

The former PBOW is located four miles south of Sandusky, Ohio near Lake Erie. In World War II era, the facility manufactured trinitrotoluene (TNT), dinitrotoluene (DNT), and pentolite for ordnance applications. Other products produced or stored at the site included nitric and sulfuric acid, which were components of the manufacturing process. The plant operated for four years from 1941 to 1944 and manufacturing processes were terminated by the end of 1945.

Possession of the property was transferred to the Ordnance Department in 1946, then to the War Assets Department, and finally to the General Services Administration (GSA) in 1949. NASA acquired the 6453.5 of the original 9009 acres. A site map is included in Appendix A.

There have been several major environmental investigations conducted at PBOW. Table 1 is a partial summary of the types of investigative activities since 1991. Several studies identified areas of concern (AOCs) on the PBOW property, which have been targeted for additional investigation. The AOCs are summarized in Table 2.

TABLE 1. Summary of Investigative Activities at PBOW

Date of Investigation	Contractor or Agency	Type of Investigation	Objectives/Findings
1991	SAIC	Preliminary Assessment	Evaluate past disposal practices, identify contamination sources
1991	EBASCO	UST Corrective Actions RI/FS	Qualify/quantify contamination in UST area
1992	H+GCL	Environmental Investigation	Characterize groundwater & surface water contamination in Snake Road Burn Ground for NASA
1994	Morrison Knudsen	Site Investigation	Investigation to assess risk to human health and environment (HHE); limited contamination was found in several areas
1994	Dames & Moore	Environmental Investigation	Determine extent of contamination in TNT & red water ponds areas
1995	Dames & Moore	Records Review	Records & historical document review; report detailed PBOW operations
1995	Bionetics Corporation	Species Survey	Identified species of plants, birds, reptiles and other wildlife at the site
1996	IT Corporation	Site Investigation and Groundwater Investigation	Characterized the types of soil and groundwater contamination at the PBOW.
1997	Dames & Moore	Remedial Investigation	Characterization of contamination of Red Water Ponds
1998	IT Corporation	Acid Areas Investigation	Characterization of contamination in Acid Areas
1999	IT Corporation	Baseline Human Health Risk Assessments	Identify potential risks to humans from exposure to Red Water Ponds Areas and TNT Area B
2000	USACE Louisville	Limited Site Investigations	Determine the potential for environmental contamination based on site activities and limited sampling
2001	The IT Group	Baseline Ecological Risk Assessment	Identify potential risks to ecosystem from exposure to contamination

TABLE 2. Summary of Areas of Concern at PBOW

AREA OF CONCERN	CONTAMINATION	STATUS
TNT Areas A and C	Sediments, soils, surface and ground waters with nitroexplosives and residual from TNT manufacturing	RI/FS complete. FS currently in preparation with anticipated completion date in FY02.
TNT Area B	Sediments, soils, surface and ground waters with nitroexplosives and residual from TNT manufacturing	RI/FS complete. Contaminated soil was removed under interim removal action.
Red Water Ponds – East Road, West Road, and Pentolite Road	Nitroexplosives, nitroaromatics and heavy metals; Petroleum by-products at Pentolite Road site	RI complete. FS currently in preparation with anticipated completion date in FY02.
Underground Wastewater Flumes (TNT Areas)	Soil with VOCs and pesticides – TNT Area B contamination of groundwater with nitroaromatics, metals, and SVOCs	Underground flumes to be addressed under TNT areas RI/FS.
Burn Grounds, Reservoir #2, G-8, Taylor, Snake, and Fox Rds.	Soil, surface and ground waters with nitroaromatics, acetone, SVOCs and metals	Site investigation complete
Pentolite Waste Lagoons	Soil, surface water and ground waters with acetone, pentaerythrinol and pentaerythrinol tetranitrate	Developing Closure documents
Ash Pits and Power Plants (Nos. 1, 2 and 3)	Surface water, ground water, transport of heavy metal-laden particulate contaminants by wind	No activity.
Toluene Storage Tanks	Groundwater and soil with toluene	Developing Closure documents
Rail Car Unloading Area/Sellite Area	Toluene, sulfur compounds, petroleum products, and solvents	Limited site investigation complete.
Acid Areas (Nos. 1, 2, and 3)	Metals, sulfates, and nitrates	Limited site investigation complete.
Pentolite Area	Pentaerythrinol (PE), pentaerythrinol tetranitrate (PETN), acetone, and TNT	Site investigation complete.
Garage and Maintenance Area	Petroleum products, acetone, TCE, and TCA	Limited site investigation complete
TNT Rail Car Loading Areas	Sediment, soil, and surface and ground water from nitroexplosives, toluene, and acetone	Developing Closure documents
Site-wide Ground Water	Nitroexplosives, and nitroaromatic compounds, VOCs, SVOCs, metals, and acids	Site-wide RI/FS in progress. Anticipated completion date FY03.

3.0 COMMUNITY BACKGROUND

3.1 Community Profile

Plum Brook Ordnance Works is located in Erie County, Ohio, approximately four miles south of the county seat of Sandusky. The 1990 Census estimated a population of 76,779 residing in Erie County. The site is located within the boundaries of three townships: Perkins, Milan, and Oxford Townships. A three-member Board of Trustees governs each township.

Because of the county's location, the community provides multiple economic opportunities. Industries in the community range from heavy manufacturing to tourism. Erie County's diversified industrial base includes foundries, bearing manufacturing, automotive parts, metal fabricating, construction products, and plastics manufacturing operations.

In addition to a strong manufacturing base, significant tourist trade supports the Erie County economy. Area marinas, fishing and boating, and Cedar Point Amusement Park attract a great number of tourists in the summer season. In the fall, sportsmen travel to the area for upland game and waterfowl hunting. The winter season provides an opportune time for winter sports including ice fishing and snowmobiling. Due to the tempered climatic conditions, which stabilize the growing season, truck farming and fruit orchards contribute significantly to the local economy.

3.2 Chronology of Community Involvement

Historically, numerous investigations and studies have been conducted at PBOW. The findings of the studies are maintained in the Administrative Record at Bowling Green State University (BGSU) Firelands Library. Community involvement began in February of 1996 with the publication of newspaper articles in the local newspaper. As required under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and with the heightened community awareness of the site's history and potential for contamination, the steps to forming a Restoration Advisory Board (RAB) were initiated. A Public Meeting was conducted at the Perkins Township offices between concerned citizens and representatives of the USACE Huntington District. To meet the requirements of CERCLA, the USACE initiated the solicitation for RAB members in June 1996. The first meeting of the RAB was conducted in January 1997. Since inception, the RAB has been the basis for community involvement and has provided a mechanism for communication between the regulatory agencies, USACE, and the community.

3.3 Key Community Concerns

Members of the surrounding community were surveyed to determine their greatest concerns regarding the PBOW facility. The survey indicated their primary concerns were the effects of historic activities on the surface water, groundwater, plant life, wildlife, and the human population. Other concerns included the remediation schedule, specifically the start and finish

dates; the possibility that contamination had migrated off site and contaminated other areas; and the lack of dissemination of information into the community to maintain their awareness of the restoration effort.

4.0 HIGHLIGHTS OF COMMUNITY RELATIONS PROGRAM

The objective of the community relations program is to provide an effective mechanism for communication and the exchange of information among Army agencies; various federal, state, county, and other community agencies; employees and workers at the PBOW facility; and residents of the local communities adjacent to the site.

4.1 Requirements

Community relations activities are required under the 1990 National Oil and Hazardous Substance Pollution Contingency Plan (NCP) and Superfund Amendments and Reauthorization Act of 1986 (SARA). The objective of the Community Relations Program is to provide a mechanism for communication and the exchange of information among government agencies, and residences of local communities and those adjacent to Plum Brook downgradient from PBOW. The program requires the use of numerous means of communication to transfer information on the progress of the remediation activities. The program also requires the maintenance of records for public review, which provides documentation as to how and why decisions specific to the remediation of the site are made.

The Administrative Record (AR) contains all documents prepared from data collection activities and other research that form the basis for the decisions affecting the remediation process. The AR is available for community review and is located at BGSU Firelands Library and is updated regularly with the publication of new reports. A second copy of the AR is maintained in the USACE Huntington District Office.

The agency spokesperson for the USACE is Mr. Rick Meadows, Project Manager of the PBOW site. He may be contacted by telephone at (304) 529-5388, by facsimile at (304) 529-5591 or by mail at *USACE Huntington District, 502 Eighth Street, Huntington, West Virginia 25701*.

4.2 Communication Techniques

Restoration Advisory Board

The Restoration Advisory Board consists of approximately 23 members from the local community. The RAB is co-chaired by a representative of the community and the Huntington District USACE. The purpose of the RAB is to involve the local community in the remediation process at the site. The RAB provides a mechanism for information transfer between the concerned public, regulatory agencies, and USACE.

The RAB conducts meetings on a regular schedule (usually quarterly), unless a greater frequency is required to discuss specific findings such as laboratory results, changes to the remediation strategy, etc. The meetings are informal and interactive as demonstrated in the photograph at left. The RAB meetings are open to the public. The meetings are usually conducted at BGSU Firelands Library (Appendix B). Meeting announcements are published in the Sandusky Register approximately two weeks prior to the meetings. Information about the meeting location and a list of the current RAB members is provided in Appendix C. Inquiries regarding participation on the RAB should be directed to Mr. Richard Meadows, USACE Project Manager.

Quarterly Fact Sheets and Policy Letters

The USACE Huntington District publishes Quarterly Fact Sheets (QFS), which report the progress and status of site remediation activities. The QFS includes titles of reports that have been published and are available, report review schedules, and schedules for the next phase of investigations or remediation. The QFSs are distributed to RAB members and other concerned citizens as requested, and also posted on the PBOW website. The website address is www.lrh.usace.army.mil/PM/PBOW/.

Bulletin Boards and Posters

Fact sheets, news releases, meeting notices, project accomplishments, and other related information are provided to the RAB for posting on easily accessible bulletin boards within the community. The USACE Huntington District may also provide project-specific exhibits for community functions.

Direct Communication

USACE Huntington District will contact the RAB members with information regarding study findings that may warrant immediate notification of the concerned community. The RAB will decide the manner in which information will be released to the public.

News Releases

News Releases regarding environmental studies, actions and other activities at PBOW are submitted by USACE and the RAB, to the local media. Appendix D contains the media list.

Newsletter

The USACE Huntington District prepares an Annual Newsletter, which discusses the activities that have taken place at PBOW in the past year. The newsletter includes charts, graphs, photos, or other graphic material that will complement the information being presented. The newsletter also highlights current projects or activities, and reports on the major success stories at the site from the past year. The newsletter is distributed at the public meetings and Poster Sessions.

PBOW Studies and Remediation Project Exhibit

The goal of the Community Relations Plan is to provide the general public with an awareness of the remediation activities conducted in their communities. Public Meetings, RAB Meetings and notifications are used to keep the local community and interested citizens informed about site activities. Another mechanism to keep the public informed is to display project information and photographs at highly visible public activities such as county fairs, science fairs and mall displays.

In March 2002, the USACE hosted a Poster Session at the Sandusky Mall, in August 2002, they hosted a Poster Session at the Erie County Fair. In October 2002, USACE hosted a Poster Session at the Harvest Happenings Festival sponsored by the Erie County Park District. At each Poster Session activity, USACE representatives had the opportunity to introduce and discuss the project with community members with various levels of awareness about the site. In addition to the face-to-face discussions, interested individuals were invited to sign-up on the mailing list to receive information specific to PBOW RAB activities.

USACE Huntington District as PBOW POC

Notification is provided to elected county and township leaders and members of the RAB that the USACE Huntington District Public Affairs Office is an available point-of-contact (POC) to respond to questions regarding environmental actions at PBOW. The POC list for the Community Relations Plan is provided in Appendix E. The current Huntington District Public Affairs POC is Steven Wright. Mr. Wright may be contacted by telephone at (304) 529-5452. The POC may be contacted at the following address:

US Army Corps of Engineers
502 Eighth St.
Huntington, West Virginia 25701-2070

4.3 Administrative Record

The Administrative Record (AR) is a compilation of documents that record the Army's decision-making process regarding the selection of the response actions taken at the PBOW site. An AR must be developed and maintained for each National Priority List (NPL) or non-NPL site where a response action is implemented under the authority of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

The official AR for the Plum Brook Ordnance Works is available for public review in the USACE Huntington District Office, Huntington, West Virginia, and locally at the BGSU Firelands Library, Huron, Ohio. The USACE POC regarding the AR is Mr. Rick Meadows, (304) 529-5388. The locations where the AR is maintained is provided as Appendix F and a list of the documents included in the AR is included in Appendix G.

5.0 OTHER CONTACTS

A list of community leaders and elected officials is provided in Appendix H. The RAB mailing list is provided in Appendix I.
