Meeting Notes

PBOW
Res #2
BG

Meeting Location:	Teleconference	Client:	USACE - Nashville
Meeting Date/Time:	4 June 04, 1000 EST	Project:	PBOW – Res No 2 Burning Ground
Subject:	Shallow Well Installation	Project No.:	35BH9301
Participants:	Linda Ingram – USACE Jim Beaujon - USACE Lisa Humphreys - USACE Rick Meadows - USACE Ron Nabors – OEPA John Weaver - OEPA	Notes Prepared By:	Al Hardesty
cc:	Virgil Jansen		

Notes	Action
<p>The USACE–Nashville initiated this meeting to discuss the installation of shallow overburden wells at Reservoir No. 2 Burning Ground. Information available for the discussion included the soil boring information collected during the May 2004 soil investigation and the water level data collected from piezometers installed in May 2004. Jacobs also prepared a summary evaluation of the data with recommendations to forego installation of the shallow overburden wells.</p> <p>Based on the lack of sufficient water bearing units in the shallow subsurface it was agreed by all parties that shallow wells would not be installed at the site.</p>
