Comments for TNT Areas A & C
Remedial Investigation, Volume - 4
Focused Feasibility Study for Soil and
Sediment

Rec'd CELRA 16 May 03

May 13, 2003

Ms. Linda S. Ingram
Department of the Army
Nashville District, Corps of Engineers
P. O. Box 1070
Nashville, Tennessee 37202-1070

Dear Ms. Ingram:

The Ohio Environmental Protection Agency (Ohio EPA), Division of Emergency and Remedial Response (DERR), has reviewed the "TNT Areas A & C Remedial Investigation, Volume - 4 Focused Feasibility Study for Soil and Sediment." This document was submitted to the Ohio EPA by the International Technology Corporation (IT) on behalf of the Corps of Engineers, February 27, 2003, for review and comments.

The Ohio EPA, DERR, has completed its review of the Volume - 4 Focused Feasibility Study for Soil and Sediment. The Ohio EPA, DERR, has one comment. The U.S. Army Corps has already developed cleanup levels for soils at TNT Area B. The U.S. Army Corps should compare the proposed Remediation Goal Options (RGOs) to see if the levels are comparable. If they compare, a statement should be included indicating the consistency. If they do not compare then the U.S. Army Corps should briefly discuss why the numbers are different.

With the exception of this one comment the Ohio EPA, DERR finds the document acceptable. If you have any questions or comments feel free to contact me at (419) 373-3147.

Sincerely,

Ron Nabors
Site Coordinator
Division of Emergency and Remedial Response
