ReConfirmationSample

s.mlm (6 K... Hi Lisa and Rick

I just got a reply from Todd Fisher, of NEDO, concerning confirmation samples at Ravenna Arsenal. I have attached his response. It sounds as though the Corps is doing more of an area clean-up versus spots or trenches. I believe that screening and confirmation samples would be a good approach and possibly more cost effective. If need be, please call me and we can come up with an acceptable approach for this sampling. Hope this helps.
