Subject: Round 1 Quarterly Groundwater Monitoring Report
Acid Areas 2 and 3
Plum Brook Ordnance Works

Dear Rick,

The Round 1 Quarterly Groundwater Monitoring Report for the "Remedial Investigation, Part 1, at Acid Areas 2 and 3, Former Plum Brook Ordnance Works, Sandusky, Ohio" was submitted on April 15, 2005. Per our previous agreement, comments for this document will be incorporated into the Round 2 Quarterly Groundwater Monitoring Report. In order for us to maintain the schedule for the Round 2 Quarterly Groundwater Monitoring Report, please provide your comments relevant to the Round 1 Quarterly Groundwater Monitoring Report by June 15, 2005. Do not hesitate to contact me if you have any questions or concerns.

Sincerely yours,

Al Hardesty

Linda,

Here's the only comments we had on the PBOW Round 1 Quarterly GW Monitoring rpt. Could you please see that Jacobs gets these? Thanks!

Lisa :)

Lisa/Frank:

I reviewed the PBOW Round 1 Quarterly Groundwater Monitoring Report (Jacobs, April 2005) and have only a few minor comments below. I don't know where you want to archive these comments Lisa, so I'll let you do that. Please forward along to Linda/Jacobs after all of EC-CE's reviews are complete. – Erich

Comments: PBOW Round 1 Quarterly Groundwater Monitoring Report – version April 2005 – by Jacobs

- 1) On the spine of the report “Aprilr” is misspelled.
- 2) Section 1, paragraph 1, 2nd to last sentence: Note in this sentence also that the Huntington District USACE has project management responsibilities for the PBOW project.
- 3) Section 1, paragraph 3: suggest adding “of quarterly groundwater monitoring” after “Round 1”
- 4) Section 2.1.2, paragraph 1: Figure 2-2 lists shallow well names as “AA3-GW-003, AA3-GW-004, AA3-GW-005”; this naming convention is similar to other acid areas wells. But the text of this section, other sections, and table of this report leave out a hyphen in these well names (e.g. AA3-GW003, AA3-GW004, AA3-GW005). Please resolve this discrepancy.
- 5) Section 2.1.2, first paragraph, second sentence: It seems reference to Figure 2-1 should be to Figure 2-2 instead.
- 6) Section 2.1.5: It would be useful to have surveyed coordinates listed on the logs/forms in appendices A, B, and C, even though coordinates are provided in tabular form elsewhere; this allows logs to be used/distributed independently.
- 7) Section 2.4, second paragraph, first sentence: remove “and” between “equipment” and “was.”
- 8) Section 5.0, second paragraph: OEPA acronym was already defined, and just OEPA was used in prior paragraph, so “the Ohio Environmental Protection Agency” can be deleted from this sentence - leaving just OEPA.
- 9) Appendix D: Can the pictures of cores be enlarged a bit (e.g. to the same size as development water pictures in appendix E)? Enlargement, if resolution allows, would permit subtle geologic features to be better observed.
