Subject: Contract W912PP-11-C-0007  
MMRP SI for SE IMA Region - Advance Information Packet for:  
Former West Virginia Maneuver Area, Grant, Preston, Pendleton, Tucker,  
and Randolph Counties, West Virginia (FUDS Project No. G03WV0013).

Dear Mr. Meadows:

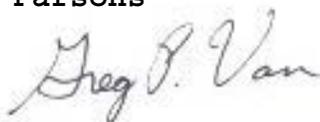

Parsons, under contract to Eco & Associates, Inc., has prepared an Advance Packet for the Technical Project Planning (TPP) Meeting for the former West Virginia Maneuver Area in Grant, Preston, Pendleton, Tucker, and Randolph Counties, West Virginia. Additional copies have been provided for your distribution to the regulator (West Virginia Department of Environmental Protection) and other key project stakeholders. Preparation and submittal of this packet is not required by the project's Performance Work Statement; however, Parsons believes the intrinsic value will yield substantial dividends by providing the TPP attendees with an opportunity to familiarize themselves with the site backgrounds and our (the TPP Team) proposed Site Inspection technical approach prior to the TPP meeting. In this manner, the likelihood of a productive TPP meeting resulting in active participation and concurrence (or alternate idea discussion) is dramatically increased. The Advance Packet includes the following components:

- Contacts List
- Site Directions/Map
- Draft TPP Meeting Agenda
- General SI Technical Approach
- Process Flow Chart
- Site Specific Technical Approach
- General Site Maps (topographic and aerial background)
- Project Schedule
- Graphical and Tabular Conceptual Site Models
- TPP Worksheets

If you have any questions or comments, please contact the undersigned at (303) 764-1927 or (720) 480-6760 (cell), or Dr. Estiri at (714) 289-0995.

Sincerely,

**Parsons**

Greg P. Van  
SI Task Manager
