Date: March 14, 1997

Subject: Dolly Sods North Trail Map

Wally:

Attached is a map showing trails in the Dolly Sods North area. The major features are the trails searched during the research for preparing the cultural resources report. As mentioned in that report, Forest Service personnel accompanied that group. That report states 23 miles of trails were covered. I assume that total includes the trails marked in the Scenic Area along and just west of FR 75?

Are these the trail areas the Corps plans to search? Is the 23-mile figure correct or is some amount to be subtracted to account for the FR 75 area?

Sincerely

Charles Bower
