MEMORANDUM FOR Commander, U.S. Army Engineer District, Huntington
ATTN: CEORH-DL-M (Wayne Budrus), 502 8th Street
Huntington, WV 25701-2070

SUBJECT: Initiation of Ordnance Remediation Activities at the
Former West Virginia Manuever Range (Dolly Sods) West Virginia,
Project G03WV001304

1. References:

a. U.S. Forest Service letter (2320) from Ms. Nancy Feakes,
8 September 1994, subject: Request for Onsite Meeting on this
Project.

b. Phone conversation between Ms. Lynn Frow, CEHND Project
Manager and Mr. Wayne Budrus, CEORH-DL-M, 20 October 1994,
subject: Ms. Feakes Request for Meeting.

2. Subject project is in the fiscal year 1995 work plan for
ordnance remediation as well as additional engineering studies.
The purpose of this memorandum is to initiate activities on this
project. Per subject phone conversation between Ms. Frow and
Mr. Budrus, CEHND personnel will plan to attend an on-site
meeting at the Dolly Sods Wilderness area on 6 December 1994 with
a second meeting at the offices of the Forest Service in Elkins
on 7 December 1994.

3. A Remedial Investigation and Feasibility Study (RI/FS) was
completed by Metcalf and Eddy in 1991. CEHND will present
recommendations at the onsite meeting based on the RI/FS
prepared.

4. A draft schedule is enclosed for your review along with the
Inventory Project Report (INPR).

DEFENSE ENVIRONMENTAL RESTORATION PROGRAM
FOR
FORMERLY USED DEFENSE SITES
FINDINGS AND DETERMINATION OF ELIGIBILITY

West Virginia Maneuver Area

North Central West Virginia

Site No. G03WV006500

FINDINGS OF FACT

1. The West Virginia Maneuver Area was an extremely large area in North Central West Virginia used by the Department of the Army for mountain training and maneuvering. The remaining records are skimpy, at best. It is not at all certain that good documentation ever existed for the land acquisitions that took place during the heat of the national emergency, World War II. There is work recommended for this project, and hazardous conditions are present. We shall endeavor to do the best we can with what we have, but it must be understood from the outset that little documentation for this project remains. The maneuver area consisted of a total of 2,180,367 acres of land. Of this 350,531 acres were public lands of which more will be said later; 48,067 acres were leased, and 1,781,769 acres were so-called lesser interests. According to warning order notice dated 26 March 1945, these lesser interests were covered by "trespass agreements." Apparently, the owners and Army agreed, given the contemporaneous emergency, that Army would shoot first and pay later. There are no records surviving that describe the trespass agreements or the area they covered. From the writer's extensive knowledge of World War II land acquisition procedures, it can be safely surmised that there is no information of record in any of the local courthouses as to this project.

Fortunately, better documentation remains for the public lands and leased lands. The public lands were all permitted to the Secretary of War by Department of Agriculture, all being a part (and virtually all of) the Monongahela National Forest. By letter dated 4 August 1943, 341,266 acres of Monongahela National Forest in Preston, Grant, Randolph, Tucker, and Pendleton counties, West Virginia is so permitted. By letter dated November 10, 1943, an additional 9,265 acres is said to be permitted, but from that should be subtracted 114.63 acres which was excepted by attached map (which did not survive the audit pruning of the files), leaving a true acreage of 9,150.37, or a total of 350,416.37 acres of land under permit from the Department of Agriculture. Additionally 65 tracts totalling 48,557 acres and one license from Western Maryland Railroad Company for a steam line were acquired by purchase and condemnation during World War II. Most of the lands where work is recommended are those covered by the permits from Department of Agriculture. The

remainder is an area called Blackbird Knob. Blackbird Knob is included in the leased lands then designated as Tracts Nos. A-76A: 17,515.54 acres; A-76B: 2107.74 acres; and A-76C: 3512 acres, all of which were leased 6 August 1943 from The West Virginia Central and Pittsburg [sic] Railroad Company and The Davis Coal & Coke Company. The Lease No. was W33-017, ENG 1403. Blackbird Knob, a target area, was included in these lands, and work is recommended for that area.

2. Just as the acquisition of these lands was rapid, and no actual legal description of the lands acquired survives (perhaps because there never was one due to unavailability of manpower or time), so was the disposal process unusual. Apparently, a warning order issued for the entire facility, dated 26 March 1945, stating that on 19 March 1945 the entire 2,180,367 acre facility was declared surplus (350,531 acres public lands, 1,781,769 acres "lesser interests," and 48,067 acres leased. However, a subsequent warning order dated 10 August 1945 withdrew the entire facility from surplus. As a Second Endorsement from the Louisville District Engineer to OCE through ORD dated 18 July 1950 notes, a 21 April 1945 letter from office for Emergency Management, Office of Scientific Research and Development, Washington DC (hereinafter OEM-SRD) requested OCE issue a permit for OEM-SRD or its agencies or contractors to test fire rockets and projectiles. The Louisville endorsement indicates no further information was available as to whether such a permit was issued. Thereupon, in the normal process, on 10 August 1950, OCE relinquished the land by letter back to Department of Agriculture. What OCE, and apparently Louisville District, were not aware of was that such a permit had been issued and a copy is hereto attached. Apparently the permit expired by its own terms either prior to or simultaneously with Army's relinquishment of the land back to Department of Agriculture. Also, of interest, and perhaps importance, attached is a copy of a 27 June 1945 letter from OCE to ORD advising that these lands must be decontaminated before disposal and that must done even if decontamination costs exceed costs of acquiring the land in fee. Most of the work to be done is located on the lands permitted to Secretary of War by the Department of Agriculture and remain under the ownership of the Department of Agriculture. The leases from the railroad, Tracts Nos. A-76A, A-76B, and A-76C were terminated on 28 February 1946. The Blackbird Knob area is now owned by The Nature Conservancy, which acquired it, less certain mineral interests not here pertinent, as a 3701.1 acre tract on 25 July 1991 for \$3,000,000. Western Pocahontas Properties Limited Partnership, successor to West Central and Pittsburg [sic] Railroad Company, still owns some of the surrounding lands, but The Nature Conservancy is in the process of acquiring those interests, for eventual consolidation into the Monongahela National Forest. An exact plat of The Nature Conservancy's current holdings is found on Plat Cabinet 1, Slide 189, Tucker County, West Virginia, Clerk of the County Commission's records.

DETERMINATION

Based on the foregoing findings of fact, the site has been determined to be formerly used by DOD. It is, therefore, eligible for the Defense Environmental Restoration Program - Formerly Used Defense Sites established under 10 USC 2701 et seq.

30 May 1991

MEMORANDUM FOR Commander, U.S. Army Engineer District,
Huntington, ATTN: CEORH-ED (Frank Albert),
502 8th Street, Huntington, WV 25701-2070

SUBJECT: Defense Environmental Restoration Program - Formerly
Used Defense Sites (DERP-FUDS); Project No. G03WV006500;
Inventory Project Report for the Former West Virginia Maneuver
Area, Davis, WV

1. Reference memorandum, CEHND-PM-OT, 11 April 1991, subject: Defense Environmental Restoration Program - Formerly Used Defense Sites (DERP-FUDS); Project No. G03WV006500; Right-of-Entry for Ordnance Feasibility Study (FS) at the Former West Virginia Maneuver Area, Davis, WV.
2. The referenced memorandum informed you that a contract to perform a feasibility study at the subject site had been awarded. During the contractor's site visit and as a result of interviews with Department of Agriculture (DOA) Forest Service personnel, the contractor has determined that the site with the most potential for ordnance contamination is not covered by the subject INPR. The INPR only covered property owned and operated by DOA as the Dolly Sods Wilderness and Scenic Area. The site with the most potential for ordnance contamination is Blackbird Knob which is located about 2 miles west of Red Creek Campground and on private property. Blackbird Knob was used as a target for mortar and artillery fire.
3. Request you revise the INPR to include the property encompassing Blackbird Knob and determine DERP-FUDS eligibility. Request the revised INPR be provided to us by 25 June 1991 so that the on-going contract can be modified to cover the new property with minimum cost impacts.
