As noted in my earlier message on the April 2 meeting...  
We do NOT intend to have them rehab old jeep trails that they don't use, or even those that they just run an ATV over. We DO want them to minimize the evidence that they have used them. I do NOT want them to use motorized equip on the Blackbird Knob trail, and don't think they can efficiently do so without getting lots of public opposition. I do NOT want them to drive where they are causing new ruts. I DO think they can do a fair amount of ATV work along those existing travelways, and that they can bring in their base camps or other equipment with 4 wheel drives without causing much damage.

There may be a way to word the restriction that will help us - something like restricting motorized use to those areas that will not create tracks, or specifying that we are allowing it only on areas that were previously driven, and staying away from the "former jeep road" designation, or the "travelways" designation, and emphasizing that this is for Administrative use only...
